Stream B: NON-CAMS preliminary study — locked final test unscored
Chronological preliminary baselines
Exact-target MAE (AQI)
Expanding validation fold
Climatology
Calendar + coordinates Ridge
Weather + calendar + coordinates Ridge
95% seven-day block intervals
History Ridge − same-training strict Ridge*
History Ridge − persistence*
Weather Ridge − calendar Ridge
Weather Ridge − climatology
Paired MAE difference (AQI); negative favours first
Calibration windows precede validation
Exact-target interval coverage
Split 80%
Split 90%
CQR 90%
Severe-day forecasts below the 401 lower bound
Share below 401 on censored Severe days
Climatology
Weather Ridge
* Measured-history sensitivity assumes historical feed latency.
Intervals and warnings are empirical; no CAMS-improvement or health-benefit claim.
