
A
Completed development evidence
evaluated in this paper; final 90 days sealed
Observations
Quality control
AQI targets
Issue-safe predictors
Temporal evaluation
Geographic transfer
Reliability audit
Evidence artifacts
B
Operational CAMS extension
6 of 36 archive chunks verified; no correction fitted
Archived CAMS
Run / lead verification
GRIB + unit checks
Grid–station alignment
Residual calibration
Model lock
Final evaluation
operational calibration pending
C
Deployed AirGuard application
presentation path; raw CAMS-based estimate shown
Open-Meteo, CAMS, station feeds
